Leetcode | Hackerrank

## PROFESSIONAL SUMMARY

Python Developer with hands-on experience designing and developing scalable backend applications, automation and AI solutions using Django, Flask, FastAPI and SQL. Proficient in building RESTful APIs, working with AWS and GCP cloud infra. and implementing CI/CD pipelines using Docker and Kubernetes. Strong problem-solving skills, ranked top 4% on LeetCode, with experience in system design. Seeking Backend Engineer roles.

## TECHNICAL SKILLS

|                       |                                                                            |
|-----------------------|----------------------------------------------------------------------------|
| Programming Languages | Python, SQL, Java, JavaScript, ReactJs                                     |
| Cloud and Infra Tech  | AWS, Google Cloud, Linux/Embedded Systems                                  |
| Libraries/Frameworks  | Django, FastAPI, REST APIs, Ansible, Terraform, Microservices              |
| DevOps & CI/CD        | GitHub, ELK Stack, Docker, Kubernetes, OpenSearch                          |
| Databases             | MySQL, Oracle DB, SQLite, DynamoDB, MongoDB                                |
| Soft Skills           | Agile, cross-team collaboration, Problem-Solving, Debugging, System Design |

## EXPERIENCE

### Systems Engineer - C1

04/2026 – Present

*Tata Consultancy Services*

*Noida, Uttar Pradesh*

- Collaborating with the GenAI Chatbot team for American Express to automate operational workflows using Python and cloud services, improving internal process efficiency
- Led a sub-team of 4 engineers to build and execute Python-based ETL pipelines for data ingestion in OpenSearch

### Programmer Analyst - GN

09/2023 – 04/2026

*Cognizant Technology Solutions Corp*

*Noida, Uttar Pradesh*

- 5 Star Rating and "Raising The Bar" Award winner
- Proposed, designed, and single-handedly developed an automated server-management Django backend tool, deployed in production to manage 2,600+ Amex servers and dramatically reduce manual operational workload
- Built backend components for Amex's internal operations platform (VIRAAT), implementing Python(Flask)-based APIs and automation workflows that improved processing efficiency and reduced manual efforts

## EDUCATION

### KIET Group of Institutions | AKTU

Ghaziabad, Uttar Pradesh

*Bachelor of Computer Science and Information Technology (B.Tech) - 8.37/10*

*2019 - 2023*

## PROJECTS

### Blogging Website | Individual | Django, Python

01/2023 - 02/2023

- Developed a blogging website using Django including user authentication, post creation and role-based permission
- Built reusable views, templates, and routes following Django's MVT architecture

### Vision | Individual | AI, Python, Tkinter, MySQL, OpenCV, Voice Recognition

08/2022 - 10/2022

- AI voice assistant for personal computers that simplified daily tasks, and make multitasking faster
- It can open any websites, search on popular websites, can save your reminders and answers general queries
- Added face recognition using OpenCV to automatically identify users and switch profiles like magic

## CERTIFICATIONS AND ACHIEVEMENTS

- 65 Global Rank in LeetCode Bi-weekly contest 165
- Received the "Raising the Bar" Award (2025) for consistently delivering high-quality code/solutions
- AWS Certified Cloud Practitioner
- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
- 100% Tuition Fees waiver scholarship in B.Tech
- NPTEL Certification from IIT Kanpur
